

WHAT HAPPENS DURING MEDICAL EXAMINATION?

MEDICAL HISTORY QUESTIONNAIRE

The Panel Physician will ask you questions regarding your medical history which will also include any pre-existing medical conditions you have as well as your current medications and COVID vaccination. Please inform the Physician of any previous surgery or medical procedure. This is to get an idea of your overall physical and mental health. It is most important that you disclose this information to your Panel Physician, otherwise the immigration medical examination process may take much longer and be delayed.

PHYSICAL EXAM

After filling the medical questionnaires, your Panel Physician will conduct a comprehensive physical exam to determine your overall physical health. Clients will be provided an examination gown. During the exam your doctor will:-

- Weigh you
- Measure your height
- Listen to your heart and lungs
- Feel your pulse
- Take your blood pressure
- Feel your abdomen
- Check how your limb moves
- Check your hearing and vision
- Look at your skin

RIGHT TO HAVE A CHAPERONE

You have the right to a chaperone at any time during the medical exam. Please sign the consent in the Visa Information sheet provided before proceeding. All female clients will be provided a female chaperone and she will be present during the medical examination. A parent or legal guardian will be asked to be present during examination of a client who is below 16 years of age.

You may:-

- Request the medical clinic to have a staff member in the room.
- Stop the exam at any time to ask questions about what the doctor is doing.
- Stop the exam and ask for a chaperone, even if you refused one at first.

If you have any questions or feel uncomfortable with a part of the exam, please request the Panel Physician to stop the examination and discuss with them about your concerns.
